# LANOPRO GREEN SHIELD

## Why LanoPro Green Shield?

LanoPro has been in the market for several years delivering corrosion protection products to the Shipping and Offshore industry world-wide and we are now introducing the products to the auto industry.

LanoPro Green Shield has the highest content of lanolin in the market and contains no harmful solvents or mineral oils. 100% environmentally friendly.

## Vehicle Undercoating

LanoPro Green Shield penetrates extremely well, providing a lasting, protective barrier from the corrosive effects of salts, calcium and sodium chloride. Offering an easy “no drip” application.

Green Shield also remains soft and pliable, making it self-healing, non-drying, and impossible to crack. Green Shield migrates to inaccessible areas, providing up to a full year of solid protection.

LanoPro Green Shield is available in two grades. One oily grade for better penetration to inaccessible areas and a more solid grade for more exposed areas.

Green Shield can be used on all types of vehicles like:

- Cars
- Motorhomes
- Busses
- Trucks
- Tractors

- LanoPro Green Shield does not crack or peel off
- LanoPro Green Shield is solvent free
- It is not toxic or dangerous
- It does not harm the environment
- Easy to apply
- Long lasting
- Low odour
